KEVIN RAMTOOLA

Career Changer | Python & Technical Support

Vacoas, Mauritius | kevin.ramtoola@example.com | +230 5250 1004 | github.com/kevin-r-learns

PROFILE

Technical support professional transitioning into software development. Brings practical troubleshooting, customer communication and documentation experience, plus self-study in Python and SQL. Has not yet worked in a dedicated development role.

TECHNICAL SKILLS

Python fundamentals, SQL basics, HTML/CSS basics, Git fundamentals, Windows support, issue reproduction, technical documentation. Limited JavaScript knowledge; no professional React or Node.js experience.

PERSONAL PROJECTS

CSV Contact Cleaner | Python
Wrote a script to read a CSV file, remove duplicate rows and report missing email fields. Added a README and tested it with a few sample files.

Simple Portfolio Page | HTML, CSS
Built a one-page personal portfolio with project links and contact details. It is static and has no database or API integration.

EXPERIENCE

Technical Support Assistant — Bluewave Office Systems | 2021–Present
Troubleshoots software and workstation issues, records incidents, explains technical steps to non-technical users and escalates recurring bugs. Helped update an internal troubleshooting guide and trained two new team members.

EDUCATION

Certificate in IT Support — local vocational training provider | 2021
Completed online introductory courses in Python programming and SQL in 2024–2025.

ADDITIONAL

Strong customer focus and persistence when investigating problems. Can demonstrate personal projects. Would require support to become productive with modern front-end frameworks, APIs and team development workflows.
